EQUINOX

TRICLOPS

Order code: EQLED50

user manual

WARNING

FOR YOUR OWN SAFETY, PLEASE READ THIS USER MANUAL CAREFULLY BEFORE YOUR INITIAL START-UP!

CAUTION!

Keep this equipment away from rain, moisture and liquids.

SAFETY INSTRUCTIONS

Every person involved with the installation, operation & maintenance of this equipment should:

- Be competent
- Follow the instructions of this manual

CAUTION! TAKE CARE USING THIS EQUIPMENT!
HIGH VOLTAGE-RISK OF ELECTRIC SHOCK!!

Before your initial start-up, please make sure that there is no damage caused during transportation. Should there be any, consult your dealer and do not use the equipment.

To maintain the equipment in good working condition and to ensure safe operation, it is necessary for the user to follow the safety instructions and warning notes written in this manual.

Please note that damages caused by user modifications to this equipment are not subject to warranty.

IMPORTANT:

The manufacturer will not accept liability for any resulting damages caused by the non-observance of this manual or any unauthorised modification to the equipment.

- Never let the power-cable come into contact with other cables. Handle the power-cable and all mains voltage connections with particular caution!
- Never remove warning or informative labels from the equipment.
- Do not open the equipment and do not modify the equipment.
- Do not connect this equipment to a dimmer-pack.
- Do not switch the equipment on and off in short intervals, as this will reduce the system's life.
- Only use the equipment indoors.
- Do not expose to flammable sources, liquids or gases.
- Always disconnect the power from the mains when equipment is not in use or before cleaning! Only handle the power-cable by the plug. Never pull out the plug by pulling the power-cable.
- Make sure that the available voltage is between 220v/240v.
- Make sure that the power-cable is never crimped or damaged. Check the equipment and the power-cable periodically.
- If the equipment is dropped or damaged, disconnect the mains power supply immediately. Have a qualified engineer inspect the equipment before operating again.
- If the equipment has been exposed to drastic temperature fluctuation (e.g. after transportation), do not switch it on immediately. The arising condensation might damage the equipment. Leave the equipment switched off until it has reached room temperature.
- If your product fails to function correctly, discontinue use immediately. Pack the unit securely (preferably in the original packing material), and return it to your Prolight dealer for service.
- Only use fuses of same type and rating.
- Repairs, servicing and power connection must only be carried out by a qualified technician. THIS UNIT CONTAINS NO USER SERVICEABLE PARTS.
- WARRANTY; One year from date of purchase.

OPERATING DETERMINATIONS

If this equipment is operated in any other way, than those described in this manual, the product may suffer damage and the warranty becomes void.

Incorrect operation may lead to danger e.g.: short-circuit, burns, electric shocks, lamp failure etc.

Do not endanger your own safety and the safety of others!
Incorrect installation or use can cause serious damage to people and property.

You should find inside the Equinox carton the following items**:**

1, Equinox Triclops 2, Power cable 3, Instruction manual

Technical Specifications:

DMX channels: 8
Voltage: AC 240V - 50Hz
72 Ultra bright LED's (R: 24, G: 24, B:24)
Fuse: 1 Amp
Power Consumption: 20W
Dimensions: 390 x 166 x 325mm
Weight: 4.3Kg

Operations:

There are 4 operating modes to choose from:
1, DMX mode 2, Auto Run mode 3, Sound active mode 4, Slave mode

DMX Mode

To select DMX mode, set dipswitch 10 to **ON**. You can now set the required DMX address using dipswitches 1 to 9. The start address for this fixture is 0. Please refer to the chart below for DMX functions.

Auto Run Function Mode

To select auto pattern mode, set all dipswitches to the **OFF** position. The unit will now cycle through all it's built-in patterns. In this mode the LEDs will remain constantly chasing until the power is turned **OFF** or the mode is changed.

Sound Active Mode

To select sound active mode set dipswitch 9 to **ON.** You can now use the sensitivity control on the back panel to set the required sound input level. With no music present, the LEDs will turn **OFF** and will come back **ON** as soon as the music starts again.

Slave Mode

To select the slave mode set dipswitch 9 to **OFF** and others to **ON**. The slave units will now follow in conjunction with the master unit.

Note: The master unit can be run in any mode for the slave units to follow.

DMX Function Chart

Channel	Value	Function
1	0-255	Tilts top mirror up and down
2	0-255	Tilts bottom right mirror up and down
3	0-255	Tilts bottom left mirror up and down
4	N/A	Not used
5	0-251	Pattern selector, 1 to 15 (top mirror)
	252-255	Blackout (top mirror)
6	0-251	Pattern selector, 1 to 15 (bottom right mirror)
	252-255	Blackout (bottom right mirror)
7	0-251	Pattern selector, 1 to 15 (bottom left mirror)
	252-255	Blackout (bottom left mirror)
8	0-255	Speed control

DMX-512:

• DMX (Digital Multiplex) is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions form the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a data “out” terminal).

DATA Cable (DMX cable) requirements (for DMX operation):

• The Equinox Triclops can be controlled via DMX-512 protocol. The DMX address is set on the back of the unit. Your unit and your DMX controller require a standard 3-pin XLR connector for data input/output (figure 1).

Figure 1

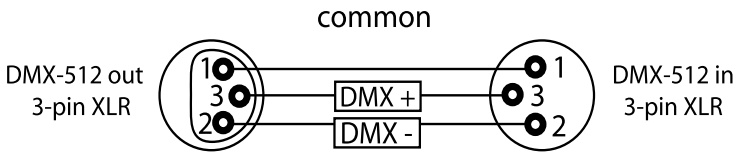
Further DMX cables can be purchased from all good sound and lighting suppliers or Prolight dealers.
Please quote:

CABL10 – 2M
CABL11 – 5M
CABL12 – 10M

Also remember that DMX cable must be daisy chained and cannot be split.

Notice:

• Be sure to follow figures 2 & 3 when making your own cables. Do not connect the cable's shield conductor to the ground lug or allow the shield conductor to come in contact with the XLR's outer casing. Grounding the shield could cause a short circuit and erratic behaviour.



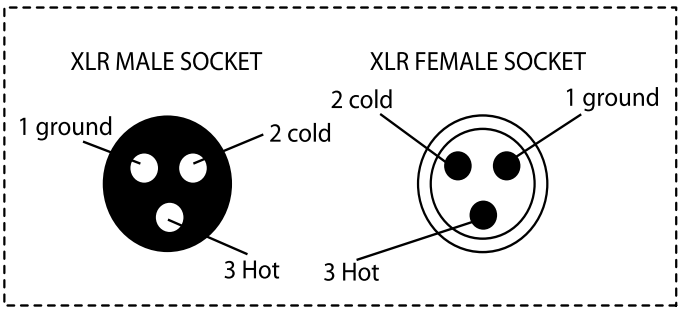


FIGURE 3

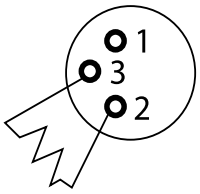
XLR Pin Configuration
Pin 1 = Ground
Pin 2 = Negative
Pin 3 = Postive

FIGURE 2

Special Note: Line termination:

• When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behaviour.



Termination reduces signal transmission problems and interferance. it is always advisable to connect a DMX terminal, (resistance 120 Ohm 1/4 W) between pin 2 (DMX-) and pin 3 (DMX+) of the last fixture.

Using a cable terminator (part number CABL90) will decrease the possibilities of erratic behaviour.

5-Pin XLR DMX Connectors:

• Some manufactures use 5-pin XLR connectors for data transmission in place of 3-pin. 5-Pin XLR fixtures may be implemented in a 3-pin XLR DMX line. When inserting standard 5-pin XLR connectors in to a 3-pin line a cable adaptor must be used. The Chart below details the correct cable conversion.

3- Pin XLR to 5-PIN XLR Conversion

Conductor	3-Pin XLR out	5-Pin XLR in
Ground shield	Pin 1	Pin 1
Negative (-)	Pin 2	Pin 2
Positive (+)	Pin 3	Pin 3
